# TRAINING COURSE PRICES AND COURSE SCHEDULE SOPHOS NAC ADVANCED

This is a hands-on two day training course intended for customers planning to implement Sophos NAC Advanced (SNAC), or customers with an existing installation.

## Sophos NAC Advanced Course Summary

This course will cover in detail the architecture of SNAC as well as its day to day support. Attendees will be provided with laptop PCs (up to four) on which they will complete a series of labs to configure a pre-installed fully working SNAC environment. A typical SNAC deployment consists of a SNAC Application Server, Microsoft SQL Server, Active Directory domain, DHCP and Persistent Agent enforcement. Attendees will also learn how to troubleshoot and support a SNAC deployment, and how to get the most out of the product.

Note: Due to the varying nature of Sophos NAC installations, the course does not ordinarily cover product installation. If you would like to cover this, please discuss a bespoke training schedule with Foursys.

## Foursys Training Courses available

- Sophos NAC Advanced Administration 2 day
- Sophos Endpoint Administration 2 day
- Websense Web Security Administration 1 day
- Microsoft ISA Server 2006 Standard/Enterprise Administration 2 day
- Combined Sophos Endpoint and Websense Web Security Administration 3 day
- Combined Microsoft ISA Server 2006 and Websense Web Security Administration 3 day

### Foursys Professional Services Guarantee

If you are not satisfied, or if circumstances outside our control prevent the services work being completed, then a Foursys engineer will return at no extra charge to complete the work required or the cost of the work will be refunded.

Foursys professional services and training courses are provided by certified engineers with practical experience in the products involved.

All course content is provided in paper and electronic format. A certificate is provided on completion of the course. See over for detailed course schedule.

## Foursys Training Courses

Foursys training courses all have these key advantages to customers:

- **At Foursys or on-site**  
Choosing to hold courses on-site can mean that more people can attend and you do not incur the cost of travelling. Alternatively, you can come to our dedicated training room at our offices near Cambridge.
- **Small Class Numbers**  
A maximum of 4 delegates ensures that everyone has plenty of one-to-one instruction and gets the very most out of the course
- **Relevant content**  
We focus only on what administrators need to know, covering the installation and the actual platform that they need to use. Real life labs on setup and troubleshooting are included. This makes the course both concise and relevant.
- **Courses Can be Tailored**  
This ensures that the course meets the needs of your organisation, and areas that are not important can be covered as an overview only or deleted.
- **Cost Effective**  
Training from 1 to up to 4 people on site – or at our offices, means that you can maximise the value that you get from your training budget.
