TRAINING COURSE PRICES AND COURSE SCHEDULE WEBSense WEB SECURITY

This is a hands-on one day training course intended for customers who are either planning to implement or are currently operating Websense Web Security.

WebSense Web Security Course Summary

The course will cover in detail the architecture of Websense, including all the key aspects of running Websense Web Security on a day to day basis.

Attendees will be provided with laptop PCs on which they will complete a series of labs that enable them to get hands on experience with configuring 'live' systems with Websense.

Attendees will also learn how to troubleshoot and support Websense deployment, and how to get the most out of the solution.

Foursys Training Courses available

- Websense Web Security Administration 1 day
- Sophos Endpoint Administration 2 day
- Sophos NAC Advanced Administration 2 day
- Microsoft ISA Server 2006 Standard/Enterprise Administration 2 day
- Combined Sophos Endpoint and Websense Web Security Administration 3 day
- Combined Microsoft ISA Server 2006 and Websense Web Security Administration 3 day

All course content is provided in paper and electronic format. A certificate is provided on completion of the course. See over for detailed course schedule.

Foursys Professional Services Guarantee

If you are not satisfied, or if circumstances outside our control prevent the services work being completed, then a Foursys engineer will return at no extra charge to complete the work required or the cost of the work will be refunded.

Foursys professional services and training courses are provided by certified engineers with practical experience in the products involved.

Foursys Training Courses

Foursys training courses all have these key advantages to customers:

- **At Foursys or on-site**
Choosing to hold courses on-site can mean that more people can attend and you do not incur the cost of travelling. Alternatively, you can come to our dedicated training room at our offices near Cambridge.
- **Small Class Numbers**
A maximum of 4 delegates ensures that everyone has plenty of one-to-one instruction and gets the very most out of the course
- **Relevant content**
We focus only on what administrators need to know, covering the installation and the actual platform that they need to use. Real life labs on setup and troubleshooting are included. This makes the course both concise and relevant.
- **Courses Can be Tailored**
This ensures that the course meets the needs of your organisation, and areas that are not important can be covered as an overview only or deleted.
- **Cost Effective**
Training from 1 to up to 4 people on site – or at our offices, means that you can maximise the value that you get from your training budget.
